who is my neighbor," and our blosed Lord, in hin wisdom presented ua with parables in bas teachinga to illustrate who the neighbor is. I mean the par able of tho good Semaritan, Luko 10: cigbbor is the individual thate our next door to us or in the bouse eloed
by. That many be 80 , but I want to tell you that your neigbbors are in wen that ; I want to toll you young ane of you is noightor togather tha I want to toll you young women, that to ono another ; and thea I want to tell
to rou that you are neighbors that roors in the next room and in the next room sour rebous, ynu aro all neighbor together, in the Seriptaral senve of the
word. As studente you are neighbora word. As studente you are naigh bors;
the profoseore are noighbors to each othor atod neigbbars to the students, professore. The Scripture iden of neighbor is one hat needs our help, one ver whom we can exert an induonce That is the idea of nelghborsbip in the mesning of the brand and porfoct law
of a living God. Do not forget that. Let as all remember that we are neigh bors and that the Lord requires us to
love one another. I think it woald bulp greatly to promote barmony syd eces amongat as, in our charch, and cobol and cverywhere else.
thought. Wass on to notice anotà bhaldren to parents, husbunde to wivos, wivea to hurbands, and we are neigh bory rolated to neighbors, but wo also

Wor ia him wo live and move and lave our belog." no obligations that we aro under to H tm ? I bave the satisfaction of beheving this moruing that there is not ond here that would manitain that position.
Young mas, irrelignous as you may ho, young mas, itrolgnous an you meny he, you uro not willing to say that yon not care for bim. Then when is true state of tho case? We are the subjects of hif government, and we owo
him opr obedience God once enid to his peoplo, and that appeal is as appli-
cable this moraing to us as to those to whow the apposil was reade, "If I am a father, where is my honor? If I an
a master, whers in my fear?" Mal 1 a master, whero in my fear ?
If his providence bas suataned us and benevoleneo and gooxincse bave
iven as the comforts and enjoy ment aiven us the comforts and objoymont
we experience, must wo not acknowl edge that we are under many obligaand old, rolnted to God. We are his servants, his creatures, bis childron, and God requires of ua our norvioe, our
love, and in the folds of this broad haw I fied the commandraent, "Thou shalt love the Lord thy God with all thy all thy mand, and with all thy atronetb." Mark $12: 30$ I find that in thas law and that is what arisen from tho rola tron of dependence which we sustan
to God. IIero in the commandment of God growing oat of that rohation, nad as to love him. It wall stand, and stand Girver ; and it will stand with iacrean-
cl weight and plainness when the volume of inspiration is opened at the judgmont day, and whea gou and I shall stand hefore the bar of God, and bo judgod out of the broad law. That
conimand will stond, aud ir we bave
not ohearved it than I need not tell you what the consequoncas will be. vine law of God given in the Scriptures, and which is another evidence
to prove that it is indeed a broad lavo. to prove that it is indeed a broad lans.
It is a law that takea eognixabes of our vory thongbts. Human law docs thoughts of its subjecte, and only looks at guilt gonerally when tboughts are put into actions. And it is proper that the admusistratora caso, since neicher the witnossca called upoo to givo teatimony can see into the heart of the human law, inctions armimstration of prove character, or to prove guilc. But a the sudrainietration of the divine or ven of buman thourhts befors then re formed into nctions So bread is the formed into notions so broad is appliations, it covers our very of thu decalogue rends as followa "Thout shalt not covet thy neighbor's house, thon shait not covet thy ncighbor's wilo, Dor his mas-bervant, nor has mand-servant, nor his ox, nor has nss, por anything that is thy neighbor's" Ex. $20: 17$. Amoog the pracopts of the divine law requirng equity between etrikes at the very root of injustice from mann to man, by forlidding the cortapt desires and conelsiseonce of wrisciple of the tenth cornmandmont, Paul kaye, "I bad not known lust, ex. cept the law had said, thou shalt net covet" Rom. 7:7. Unir Lord declares in roforence to the spirit of this eomwoman to lust alker hor hath commilted adultery with hor aiready in his John declares, "Whosoover hatoth bfo rother is a murderer." 1 John 3: 15. Mon ofton thiskt that they aro free from any win that ondangere theit sal-
vation tif their life outveardly bas bean froe from uny grose sin. But would such look within thetrasolves, into the evil ithoughts of their hoarts, and then God which condemns impure thoughts as well an impure actions, they would form a difforent viow of themsolves. Xach then is tho broad law of God. I how noticod a tow applications of fi to ton I \&hath now proceed to draw ame niterences frora this extensive application of the divine law.
1 How liable we aro
vo bo many dutics to perforn we have so many daties to porform, grow-
ang out of our various and numerous rclations which we till in hife And overy time we fall to perform oar duty in any of our rolations, we conamit sia. And then we mast remember that we fail to keep the divise law, for it makes its demands upon us in our youth as I have aroady showa. How hava we all violated requirmaensa HaFe wo not of its garta, in somo of the relat soma of ity garta, in tome of the relations in
which that law comes to as? May I not go back to our childare this morning that have always rendered hooor and respect to their parenta? I do died and lof mean orphen when I was only

EE BOLS NOT WEAR WELL

There is one property that alway adda worth to that which poseesses it $y_{\text {, durability. The above caption, is }}$ an expression, that wo often bear with snothor, expressing just the roverse, like this: "He nover wears
out."
When we are in possession of a mechine that is durable-that deen not wewe out, wo value that maching Lecause of that featare. When we parts exposed to the grenteal friction, to see the manner of construction und modes eperands, and appeal to our judgement an to ite durability. We prize durability becuase it onables as
to uyoid expenpes. Well there nothung wrong te all thre.
But tho expreseson "He does not wear well," is most genorally
reference to the preacher referance to the preacher
If duratulity is an impor

Dear Brethren evening tbat 1 report to your colamns that once more we havo had proactiog sere in this little tranchs of the broth-
oriood. Prethren Frautz and Heek of this State, eame hore the Ist inst. and brother Heck preached the same ovening from Aets fit 22, 23, followed by brotber Frantz with some very appriate remarks Theil dieconrses wor both intoresting and edifying. Thoro was a tolerably good turn out for the bort votice of the meoting, as it was close of selbool.
Brother Frantz spoke the next ovning from tho 13 th cbepter of John but I did not get to attend his service owing to nimkesa in my family, for whech I was sorry. I beard siter warde that bo dofended the eause very shly, rad that the nebool hooso was woll filled witb attedtive hearers. Some good improwions were made, as I beve heard from some of the people sices, and they say that the brothien froke the troth. THis is the first noesting held bere by tho Bretbren for three yeara. Brethren, this looks litre a long time botwen appointaionts. We render our sinoere thanks to tho above mentioned brethren for boing so kind in remembering us on their toar through this purt of the Stato, and sin coroly hopo, that others in travolling through or near tbis place, will do likowise. 1 have previouely writton to the bretbren, through tho paper, ean corning the neglected condition of the ehureb hove, but it seems our call was unbeedel, for wbich 1 sra sorry. Sometimen I awn uskod why the broth ren do aot como and preach for as hore? I know no veanon. This little branch of the eburch Is eertainly eoneidorably noglected.
I love to rend the Bible and the charcb papera, und thoreforo cab fob. tent myself protty well, and can in manner kecp hip with tho church, and sometimes while reading about your good meotiuga over in Hnntingdion, and at other plucen in the Baet and Weat, I almost imagine that I am theso with you. I wish very often to be with the brethren and sinters and attond their moetings Wo soldom bave that privilege here. But some do wot like to read so well, and therefore they, and somo of ua that do road, will, if wo ure vot careful, grow mpiritually dend witbout freaching or npintual dend w

We live bero within the limita of the State Capitol, witb bretbren on all sides of $u x$, at varioun dintancer, and then the prencbing so soldom! 1 do wish some brethren would tiske nute of this, and sec that wo would huve meeting oftener. ## THE STANDARD OF T8LAEM

Erer sitice tha solf-called falso propbet Blahomet introdaced his religion, Cbrattanity ban been made to suffor, for there is no religion or theory so tenaciouely adhered $t 0$, an that whieh is antrotuced tbrough tho cbannule of fear and igoorance. Hetaugbt that his relugion could be propagated by the sword, and such was the progress of tho false theory tanong the Contral Aafa, that within the lapse of a féw centurles, nearly all bad bowed at the foot of the Creseend.
Tbe Touks or Turhomans, a rece of Turtate, about the ycar 1035 incaded Palcstime und aljaecnt countries, orerthrowing the Dyuarty of the Calyphs,
Dan. 11: $\mathrm{f5}$. There cunquest gave riso
that for nearly two centurnes drained Eorope of ite life blood and treasurus
But all to no purpese, the Standard of Inlaem was destiped to wevo and bid defiance to the power of the Pope, meconded by the combined eflort of the rownet hesds of the Catbolic world, bome of pricsts, prophets and apestles; the place that witnessed the death und rebarrcetion of Jesus; Jerussiem that had uo often been dextroged, and ra Emit upon the very rito that eontainca of the bitter encmies of the Cromind
But what could nat thon bo no Hiebed by the force of arms, is being nougbu nbont by the onward march of nviluration and the King of the North. ## THE INVISIBLE OHOBOH

"Behald 1 bisve left mo se ven thousand of II Ispaet, of every koee that has not bowed
wito Ranh and of evory mouth that hath not kissed lum " 1 Klpg* 19 16
Tho propput Elijub had juat minde a ery bitter complant of the ebildren of leraol, nnto the Lord, as the passerd by upon the muunt, hozalded by cartbquake, tire and tempest. IIe way juat Itom tuat memorable conteet,
wher eipple handed be avconptared wher Aspgre handed be arocotered the manime hordes of laal's propbets, and dofeated thom with coodusion and slughter. It wan a tume of univereul peasant, priest ated preople bad foraker the true worslup of God, and hat gone fler tho abomination of the beatien, so that the prophut amagined bitasolt the only one that was lett, und they "oven monght his lifo to take it away." But te did not know bow large a bect there was who followed his loading, and who had refueed to kiss the idol, or to bow the knee in sacrilegioun worbip. The Lord coneulted bist borks of bames who woro worthy to escupe the sword of vengeasea. Perhups in the widst of perila and threatonings they had pretersed their integrity, or in solitudo and extlo had fostered the resolutions of virtue, and like the good
of all agee were unksown to men, but known of God.

The pount to which wo would cull attention is the general truth, that at wery period of the world's hiteory. the Lord has bad no deet people to whem te hath reeceuled bio nanie, and establisbed hiq covenant. Sceondly, that at the time, they wero compayn. tively uoknow, and thirdy, thut ns a lody, they eannot bo reogegizad in the outlinea of any huraan orgaiiation, Lut bave a appritual, and therefore an insiestle identity. In support of the first proposition we huve only to glanee at the bistoric panoratna of tho "Old Testumunt," and notico the honorable Fincemston of Antodilurian and Post tuluvan und pattiarche, Formugg in the vast tleseres of mara! barremness and dark degencracy. bright ouses of Fintur and hinth filmose
Following the patriarchal age, wo hoosen people growing in importance und unfacoses, and tpanning, through various and romarkablo vivinititudes fifteen bundred years of the world's hiteory. ARer this cumes the more glorioue Chriatian diupensation, which still ronturues, and wbich presents to
mur minds the mast interceting fiodd fer revestigation.
Triumpthately emerging from the furions tempest of pagan persecution which onveloped its infuncy, and ufter a shart scason of rest, again benieged by the furnous boades of Papht apos: tates We can truck it by tho blood of the martyro all the way tron tho tuagely of Calvary, to the tires of Sauthifall, and tho mare recent niter. matise of exile to the wild of $\Delta$ mertca. The ovidenee in suppart of the second proposition is equally vonelusive. Unknown and unappreciatod the putriarcbe pursed the uneven tenor of their ways, guided in the patb of duty by an unwavering faith, un mandeut of neglect and contamely wheh wis emitminally messured cat tin them. In the language of the aposthe, tsey contionat themselves phigrims hours of gors un the eurth, suld in Lours of sulitude and exile, thoy cornforten themselves by the netfeppation

THE STEIN AND RAY DIMOU8S10N
Ss we bave had some experictice it public diacussians, and carefully noticed heir resalts, we have no fears at all that the Stem and Ray diseussion will injure oor canas ; but on the contraty, it will eventually result muoh in our faror, at山ll mote so if it was in book form. There are two reazons $\pi$ bly we belseve this will be the result Frrat, the wont atelligent and candid men look to argument aud fair reasoning for tbe grontud of their decision; witb them sophistry, miarepresentation, or abuse bat ao the man who uses them. An abusive canse has its greatest infloence over theed who are led by prejudice ; Et ch an o anable to see the Corce of argmuant At firmt, miarepreneatation sod ridn-plit bay bave all the furce of argument winh he most illiterate, bat as time gives of portuaity for thought, nbase turns gainst the man whe uses it
While it masy be ampleasadt, even diegusting to anme of oar bretbren to read
the nbasive language, and we the mis. repreacatation of Mr. Ray, a similar of icet is prodoced on some of the mere ittelligent, even among the Baptists, so that we believe some good may cone of the very thinga which make a dikeussion upleasant. Bat the general result is, that the judgment of the more intelligent will prevail, for they give reason and argument for their decinion, while those who bave been infueoced by ridicule, see, by a little thooghe, thet it is a poor foundation for their decision. Mr Raj's efforts to absue is a pandering to the prejadicea of those whe are wealic onough to be deceived hy his sophistry, 6 each an extent that we belifve many of the more intelligant Baptists are disastirfied with hie coarse
The second reanoa why the discuabion ill result in faver of our cause is, that all this sbabe, netsrepresentation and pophistry, is often ared agninat u+ before be world We bare ofren heard of being made in mermoas. io conversation wod is writing. Froan this foet the worlid is getting Dolbing more of ahure and idersle agaioet our doptribe thas it has often bat hefore But in this discussion be world bears the sophlisity exposed, ad the trath aet forth io the streng ar guments, and the plaia ressoaiog, on which lirother Stein relics It is true, ar bretbren bavo to rosd and bear with it sot better to bear this mach oapleasaat matter for the sake of baving the truth set forth, and the nophiatry exis doing? the world as brothor Steis
able defease of our doctribe than brother Stein is making, and we feel confídeat it cmonet fail to coavince many candid and iotelligent porsons of the trath and atroogth of our doetrine While tbeso are our viewe of what will be the result frous the begianing we have thougbt it Wounl he better, and do more good to have the discussion published in book pacapblet form than to bave it in eus papers, because it eould be proserved ad re-read to greater profic
But there ls another thing to conuider now ster publisbiag this euch of the discasion. To stop no w would give Mr. Ray aul advaatuge of us, to use still more sepblstry, and say we ntoppeci becatse we were losing graond We dou't thiak it prudent to give him that aivantage. He woulal say one of our papers bad deserted brother Steln, and would likely publish these things to the Forid to our injury ; heace we feel it is aoro pradeat to continue at we hase begua, and when it ia over we want if io pampblet form, at we still bold to that ulea with more contideace dow tban when the discusrion comanonced.

## ORUMB-BASKET -NO. 4

## by DANIEL matom,

## the blysesina of whitisim

A liear brother, whoso nearly fou: core yesrb bavo bicactiel his locks silvery white, writes, it a private tet ter, "What a bloesed thing to have a heart 10 work willuggly for the good of others-aucb a beart finde its highost eward in the constiougness of bones work for the gead of otbert The houghte thun directed, movo the batd to priat on peper the signs of ideas
elt. How strange, when deoply thought of, that the band moves, propelled by the wilt, putting signt on pspor, which con be read by distant and proas, by which thoseninns cat be multoplied, so as to be read and digestmultoplied, so an
enl by thousands.'
While reading the abovo, 1 wonder W why it is, that not every one in the church zifprocinton und realizes tho bessing of tho art of writing and printing, as does this dear old brother Ife deesss it as sacred priviloge, to find his "spirit in eommunion" with tbo Hethreb and fistens, when bo reads
their refresting and foul-encourigiog roductione, It is a blesaling to bicu, When hin soul feeds on the "ideas foll" by othors, communicated to bum hrongt "oigmo" put ob paper, by "dia. tuet freends" The query with tac is why do so many not fiml in our church priodicals, what this dear old brother does? The mystery is not so deep but hat it can essily be solved. I will mention a fow reasons, but the subject "erumb."
Though the reasons aromady, yet
they may be brought under two bend velopment, and the of inter is prejul do Under the first beading there are many, eapectally in these parta around here, where the Pennsylvania dialect is epoken, who bave no print in (heir mother tongue, but must learn the Eoghath atmost like a dead lanpapors would, willingly, if they could fally underatand the Engliab. Some who are tskugg them bavo not the full benefit, bocsuse tbey cannot comprebend ao as to be in comanilon with the wntura. This class havo our aympathica.
Under the neeond beading, I do but know whether there are many or fow, but I know that there are some. Theugh thoy themeulves would say they are not prejudiced agaibat them yet actions speak louiler than Woril and their actions against them plannly prose their prejudico. For example, if a bruthor looks upen, and sets aganet the writings of the bretbres witb eontenpl. and $y$ et ho himeelf is a prolific reader of both ancient and moders writers, is sucb an ene not prejadiecd saninot the writiogs of the brethen? Honce, tha elaes doos not
find it our charch papers, what the abovo muntroned of brother tloce, because of tbeir prejudice One diseas ed wath prejudice, is liko muto ut man disensed witb luckjaw-though the inmest soul would crave the bread of hfe, and is placed beforo hum, fet prejudice provents bim from talang thereof Thata clasadranecs many ehjec tions againat cur papera, ond if they outh bo iaduced to read thea, they would only real, trying to find some thing tbat dees not agree with their ideas, 80 es to bo able to consure pacetion of the apostlo Paul to "Pros all thang, and bold fant to that whie is giot" " They reverso thoinjunetion. provng, and then bold tant to that whelh theg thiok is not good, Thems Yo lesson io matare for tus all to leary You drive a bord of ebiep into a field of jasture; thoy will grave it delight, and if they bhould happen to fiad the plant of deadly night shade, or other pasens, and feed on the sweek, nuth thous pasture. 'They will not refue to eat, because there is poison in the field, peithor will they eat the poison, but the swect grass, Hence, thoy
come nearer fultilling Paul's injuncUon, thas some mes, who first go over a whole field of pustere, looking for something that is not good, and if it an foumi, they will not cat at all, but consdoms all. This we what nome do nith our cluarcb pugera-condemn ull brcuse thoy tind something objection ble in them. Writing is the commun-
cation of thoughte, to well as is proneh cation of thoughte, te well as is proneh-
ing The former duffers from thit lat tor coly in its art of operation. If the thoughts are good, thatrecting, oncouraging in well doing, contorting in distreat, having a beasen-ward tendenthers rigit to communicato tbem to good, bave an evi! teodency, then it is wrong to communieate them, oitber through the art of writing or spenk
ing. He that wettes erronecus dos trinen, will atso, when bospeaks prewe them. Poheon is polson, whether you take it is pills or in powders. A good netritious soup 15 wbolesome, whether or drink it out of a bowl. It is the good or ovil thoughts, which rebder it rigbt or wrong for us to communieat thom, and not the art by which it in dono. What a demoralixing, boul-cos tho human furmaly through the cointa sication of oril thoughte spriggin from the dovil! But apin, that soul-curapturing, heart-manctifying blebsing has boes manifested unto us, by the communication of grood thoughts, over apringing out of Christ
the Son of God, the fountain bead of all good thoughta! What a field of

When we connider bis emment, poetical powers, bis deep piety, fervent real, exalted prosition, and devotion to his God, we ought to sttach great itm portance to hie teaching.
Not to walk in the counecl of the ungodly, means, to walk in the counnol of the Godly, and, by eo doing we are blessed. All pernoni, in all ager of
the world, who have eerved God, can testify to the truthfulness of the Psaluaist's langungo, To walk in the counacl of the godly, meuns to do God's will -to do nght. Whenever we do right, our hearts approre of our
netions, that they are wrongbt in God. We are not only blosed, but
fer blesuings upen others.
The godly, will counsel to be bonest When weare howeat in all our tranit When weare bodeat in all our tronib-

The godly wall slso conneel to be semperste. Whon we thus walk in their counsel, we experionce sll the
blessinge of temperance, by enjoying gooll bealtb, long life, and by oxercis ing all the attributes of ort nature in that order, and under that control, God

Baptiem for the recussion of sibe is oo expression used by the iospired writors ; not in the scase of haptism only, but in counection with faith and repeatasee, its satevedents Tho expres. ion "baptismal regeneration" is false, becaate there is no sach thing. Tho fatbery got all then of baptism se being a beand of salvetion witboat its antecedents. They called that baptiemal cedents. They called that baptisenal would regeracrate un infat or adul: would regencrate un infant or adul;
without dipendence on fath and repent asce. But if faith and repentaace hayo syything to do with regeneratios, then it is no more a haptistal regeneration then a faith regenerstion; if faith, repeatance and baphise liave anytbing to o with regeseration, thea regenerations s of all sbree of thera, aot of one obly.

This bringe us to the work of notiop arefully the propar bie of the term re reneration. It is ao common that we may beronw careleso is the ase of is. Regoneration does dot come frod bop: tism, but baptism cumes of regeaeration It is the cause, bsptism the effect. Ger vrate meane the beginaing of lifo or growth, and acgenerate means to genel ate sgnie, or the beginaing of a oum life. Regexacration is a troaslation of the compouad pultu, which measa agoin. or repeat, to do sonvething over; wad encial wheb moana tho begianing of a life, or atate of belayt beace reguseration applies to the begianing of in new life or a aew atate. ## OUR DOUTRINE ABD PRINOIPLES

It prosent the priseipios and doeLines of our charch need to be care. filly stadied and fuitbfully taught They are all dorived from the Gospel and should be studied baek to thoir fountain besd. The opposition our doctrine now bus to meot is more than ever before. Twurntuasions in our papern, snd moro threatonct by thor Who opposo us. Hunce it is a matter of
bighest importance, when a brother takes the responsibulity of engaging in a prober discussion. Ho takes sbout all there is or can be of roaponnibility plued on man. The cbaracter and standing of the whole church rests on bim. The cause of Christ, tho truth of the Gospel is in bis bands; and if be faile, how grent the loss I how far it reaches ! All the powers of mind, all the rescaroh of etudy and properation that can be made ehould be exhausted by a brotker before be engagee in it. It is not enougb to only truet in Gid and pray to him for help. We should use all onr own powers in a thorougb proparation before ever attompting a dibeussion. Mon of learning and deep. eat mind genorally dotarmine how a diacussion resalte. Men of strong projulheo are seldom moved except to grow strongor. Those 6eeling for rutb are rathor slow to determine, but after careful thought will generally de-
cide in favor of the clear, plaju, reacide in faver of the clear, plaja, reabise preaching, it requires a thorough knowledge of both sides of every nub. ect and areument. It requiree acionce und learoing to mevt the many ways an opponent may aso thoun as argamont or for appearance. It requires
the truth to be ser forth cloarly provos and sent bome with power and confidenee, which a thorough knowledge of the mabject ulone can give. A ditecussion that juat romen out oven ia not What wo want, neither in thacusaion ong where part of our doctrine gained and part of the opponont's. But wa want a cluar triumphant vieto
ry not only on soms of the but on every subject. To gaia this it a important that the groatest possible proparation he made beforebatod.
Another reason why we sbould atndy the true prineiples of the Gonpel elone
gospel priseliples. Hence tho gruat need of searching the true prinesples of tho goapel, to rightly determinu the the ground of union and anetters in the charch. If there bo no eottled doe trine cad priweiples uaderdood, there
will bo no bettled faith and practice. One governed by one pribelple and otheta by a difarest priacifle, will pever act is barmony. Hence the necessity of all being goremed by the eame prip uiples. This requites es all at prevent To jirayerfolly study tho true principle taught fo the gorpel, for they are indis peasable to onr osepess and barmony.

Another reason wby the prinefiples of tbe goopel sbould be atodied is, they are the ouly certsiaty or assurade of the proper Cbristias character. The poner which goverus meu in ia the pribeciples from which they set The drankard in governed by the priariplo of satiesy hag the depraved appetive, the deaires of the lleab. The tecpperate man is goverbed by the priceiplo of moral right. If one man is goveraed by the princlipho of law, 2nother ia govsoed by the "prineiple of sellighoess: they will not net alike. When the priaciple of lowo rules it will manifest tself in many waye. so when selfahness pales it will be masifested in ma0y ways, If the priaciple of sumility rules, it will wamfest iteelf is its own ways slso. If the pripeiple of pride ules, it will find mang|tray to masifeat thelf Wo sbould stady asd tesch the prisciple. To ouly tench its manafesta tion witboat the priveiple ia not giving the goepel trutbfully Where the prinefiples of trath are fuily establisked tbe preper manifestatioa folluws, the effect follows its enose. We apead too much labor, and study, mod talk about the of fect-the manifestation-Dot enough about the priseples which proluce them If a man's pribtiples sre right, it is not dillealt to get bis actions right! hat if bis princlples are wrong, it is very at all pogsible.
hothur reason otill why we rbould tody and teach the priaciples of Goape rath with noote care is, the greay nuc cess of masionary work, the larbe Dum-
ber bewg added to the eburch by ite la bors, require of the bretbres is then missionary labor to teach the prisciphto of the Gospel clearly. In them we caia bere union and barmony, for it ia by true principles that men are led to right news. Tbere in no work more import at io the adrascement of the chareb thas its principles well established Tbey inate ite pesce, fie streagth, and its prosperity. If the true doctrioe and principies of the gospel ate not well 60 tabliehed in minajonary work, it lenven greest cbences for trouble to lollow, for witbuat principles to govern our ection with the Gospel.
Anather reason why tbo pribciples of the gospel sbould be foithfolly stadied and taught, is bectase some pripeiple good or bad, will coter late the beart a an early age. The evil or wroag principles ofter get possesaion of the beart, and terns all the actions in the waya of sia, oaly becasos there tas heen but jit the effort to tesch the primeiplea of the gospel The only asparance we cen have that the primeiples of evil will not grow in the beart, is to bave the truth faitbrully teught. The principles of the gospel are our asfeguard agaieet the orile and temptatione aroond as Tbey are our mende of warking a reformation lor good, they are our mesia of warklug is true eaaverion, they are our geans of growth had strebith in the invine lifo, and witbout them the mero tormas
aion.

Principles make a btrong mad, trong cause. Forme withont priciple make a wenk man, a heak cause. That whicb is bused on principles la firm and solid Thas atieb is ouly on formality is an emply ebow, st ceasoless confusion III true greatoents comei from prisciples, pel
mone of it from mere practice or simpte anformity to castom. All trine formalis the ontgrowth of pripeiplo, and is only true when it is a proper represodta. tive of trne principles. The espirit of the Gospel workn throngh pribciplex to manifest inelf in a pure Chtiatian character, which folly represents the spirnt, the trath, and the prinelples. of the 'ion

things that pertaia to tho proner mapifestation, or cstrying out of all Gionpe pripeiples.
This sabject is brought formard now because of a namber of lettera we are ro ceivng, asking aur conasel concarbing certain petitions that are being circulst ed in some cburches to bave some mens. ares enforced opoa \& M on a achibat io vo made, whick leads as to look is the principles whieh ure in them 'and whicb biss gorerned our brotherhood from the bogianing dowa till sow. If a rsan कrites or upesks ou this sibject or hay there is no certbiaty fa what be u, ll say or do, only that any course to nccoar-
plish bis eads is likely to be taken. Above sl things it is importaat that we be notcled down ot principles.
The litet prisciple we want to look at reference to these petitions nod what they mast, is the natare of A. M. Ss to
its decistons beiug infallizle, or unshungeable. It has been the sottled pribecpla of our A. M. to reconsider sal smend its former docistions, bence it vever beld its owa decisions as being unchangenble, or as equal to divine ser-
thoruy. Whe namo this princinte bo eause we bave read bome hard tbriasta at A M. en accosant of recoosilleriog and changing some favorite decision.
Now if thes petution devigas changing thes prouciple sad making its former decishons like the laws of the Medes nad Cistons cquel with the Gospal is po its deare against it, for it changes the principlas on wbich the A. 31. has etaod from the beginding But as I kcow tut wbat are she priseiples is these petitiona, I chanut do more thas call the brettren to look carefolly and sec if they bave any priaciples
coptrary to the Gospel and order of the brotherbood
The sectend prineiple of the blotber involved in the petitious mbich we notice, is on the extbject of feet-washiag. What bas ever been the priociples of the brotberhood in regard to what is called the double and siggle moole of leet-washiag? It bue always beld that
both-were valid and weceptable with God, and it bas held in full fellowsbig those who wasbed by the slagle modie. The principle they could well maintain, because there was in reality but one mode, that of putting the feet vato the water to wash them, becce there is no principle violated. Agsia, - . M. bas always beld the principle that every one who commuved should be washel, but nover made eithar node essential to proposes to make one order potition and expal the other, 1 am againest it, for it is in direct vialation of the prisciple that bas always obtained in the clureh recogniziog both as valid.
It oray be said, the old biethren tried to have the double mode to tecome unizerssl the the brotherbock. That matter of pulicy and expodien'y, but bever made it a satal quention. Tho

Besides this special belp to these holy mon while preuchinga tbere was a general belp to the poor shints, of wheh wo need not denied.
But we sabt to yee if this sume rinciple of giving and reveiving belp whe admittod by our old breibren. Nearly forty yesm ago we heew one brotber to give a minister forcy dollare woother gave him about fitty, und an otber gave him still moic, there was no ono said anything ugamet it. We feet rad to think of some other bretbren who have gone to their reward, as brother fame Tracg, and otbera that we conld menton, who labored lathtulty in the calse lut their wantu wore not supplif ed, like the apostles and brother
vasda. In that das there was no ry of aslariod ministry raised, not one sid anything against it, for all admit ed the prineiple was rigbt. But now petition agaiest ealaried minitity circulated, when there is no sish sing to our knowledge. We are pres ig woll acquainted in the Middle and Western Stater and we know not of single case, All tho help we know anything of is on the eame principle of the Savior and the apoutlen, whose wanto wore suppliced by the fremwill donations of the frithfil, Now if the petition offers to change this principle am beranet it, beeavec it io in dircs ondiet with tho Gompel and tho pria sple of the old brethren, when they allowed the cburebes to give such belp to the miniatry at they felt was their

The fourth matter sbout which sone
of edncation, that compelle us we educats our childres. as wo are compelied to at the improved maschinery of the age
We can po more tie down to the illiter ato and enlearned, ancultivated miod, and expeet to preeper as a church, than we can hold to the unimproved way of ferming and prosper in that. But this is dealing with expedients. The principle is that nothiog in troe eciesce and the prlaciples of Cbristisuity, because both come from Ged, one through tlon, the other through revelation.

But in this matter there is nootber priaciple brought up, when high echools their time, when the query was asked in 1831, whether it was advizsble for a member to have his sen elucated at " $\AA \mathrm{ndu}$ uby?" ## SORIPTURE ITALICS.

Pesuliar to the Erglisls version of Holy Keripture are the namerous Nords and clanace printed in italice.
Not a fow roadere presume, nhat this differens typo denotey omphasis. In Seripture, as in other Engheb books, it is thought, emphntic words are italcised. und not unfrequently auch Fords and phrance ate read or quoted ith special stress of voice, as if the ed on the italielised ladguage.

## ed on the italictsed language.

Italietbed words bave bad a place in
be Eagliwh veraion for jwibaps thred huodrod yesra They appeared in
what was knowans the Behopis Bible, and were alopted and continued by the tranelators under King Jamen, the suthors of the Eaglish version now in common nse.
So far from denoting omplaais, italics aro uned to designato the worde and clauses which bavo been added by the translator* to the original text, in order mone acrurately and fully to ex prose, according to thoir judgmont, the sonve of the llobrow and Greek. These words and clausen are not a part of the Scriptures, and chey nee pridtedin reador, that they are the words, not of isapired writers, lot of the tramelan tors.
In mady chaes there in a nececaity That a word be udtled in Koglisb, in the translators were not plaverned rig.
dily by suech necessitied Vory ire anowtly worda and clausen are intorpolated, when the expression of the meaning of the originsl in our lan guage does not require it In other nastances thoy servo to obscure the meaning. Nor is it nojust to eay, that, in many patageg, the italieized worda are equivalent to A comment; and the Hebrew and Greek. Any Euglisb reader can satisfy his own mind by an ramination of the common Engheh ext bimself. Whilat often the itali. oined words arc ascessary, he will soon find, that, in very many inatasces, they are altogether buperfluous.
Take, for example, 1 Cor. xv, 41 , For ove star difforeth from anothar tar in glory:" The words one and anther are itterpolated, and witbout cuasc. The Eng ${ }^{\text {bish }}$ would be just be god and oven more forcible, if the treek were rendered withoat awy adontiong. Then the Engliah woold be For star differotls frose star in gloryT'urs to the passuge, Heb. H. 2, "Looking unto Jeass, the author and finisher of our faith." Here tho prehoun oill supplied. Not only is tbe word not if mocsary to make plain English, but
and limits the neaning of the anthor, who is declaring Jesus bo "the author and finisher of faith. rang the word farth to denote the ases the samo word many tumes in bie epistio to the Galatians We refer but to one paesuge more, Heb. ii. 16, "For verily he took not on him the onture of angeln. Lat the reed of Abraham." The exprensan the nafere of is not in the Grack. Nor do wo Doed it in the Euglish. Besides, the tenso of the in the present, whilst in the Eaglisb We have it in tho past tenso; perbaps because the past tense may more read ily be eonstrued with the interpolated clawee. Uaing the sume Englisb words, we may render the Groek thus: For be tuketh not angels, hat be tak oth the seed of Abrabam. But this i oomewhat obscure. By taking nsoth or Eaglist vorb the racaning will be cloarer. We may veuder the passage For he belpeth (or reseueth, not an
gole, but he belpeth the seed of Abrs. ham

The Eaglash reader will, ns a rule, get the sense of Seripturo more dehisitely, if be will read our execllen Finglitb verson, omitting the itnlicized exproseions. Then he will bave word for word, the meaning in hie owa language of the word of God. For, takee as a whole thate is no modern veraion
more faitbful to the Hebrew and Greek than the Englieb Bable - Mre

## PULPIT-SFRUP,

It is a common notion that a Chris than winiater'e chief misition is to brine of wheer to them, to try to make thom heppy. But that was not the propbet Nathan's idea when he broughs home the "Thon art the man" robuke $t$ King David. Etijah bad a very ditter Ahab in the way, and told bim that be was the man who bad brooght trouble on Israol. "Let this man be put to death," eaid the princes of Jeru. salen, concorning Jereminh; "for thus he weale war that remain in the eity, and the hands of all the people, in apenking such words unto them; for this muan
seeketh not the wolinre of his people, but the hurt" John the Baplist wae is most discouraging proseher. Psul's otters to the early churches are fill of tinging reproofe for partionlar aina'Thoy couldn't luaco been altogetber pleasant reading to those who received them. And how the lored nud loving disciple John did not etir up the eeven oburches in Asia' Making them fool good seemed to be the lant thing in his mand. IIs was a great doal raoro iotent on shoving then what thoy ought
to do, tban on encouragigg them 1 be happy over what thoy had done. A mininter is Goil's meaqenger to declare God's ruth, whethor it rofreshes or haturbs the bearer. There are few persona in any congregation who ought never to be made uncomfortable by what God bas declared coneorning their present course of conduet, or their inaction. There is no congregation that is beyond tho need of the explicit rentifder by the man of God of bhorteominge in duty, aed of dangor from apathy or solf sufficiency. Was it not John Quincy Adams who said that he beat liked a rainiater who sent
him away from chureh feeling disactisfied with bimalf? The minister whose only pilptit medicino is noothing syrup in not likely to bring up ehildren in the fiith of whom ho zill be prond with whom God will bo plensed. 8. Tima

## THE ELECTRIO LIGET

The value of this nethod of illumiation in showing the color of pictures has beon demonotrated in at exbilition beld at the Roole dich Beanx Arts. A number of Jablochkoff candles were employed for lightivg at night, and the success was so great that it has been propened by M. Turquet, Director of Fipe Arts, to open by night the oxbibition of pictures now held at the Pa lais do PIndestrie. It is stated that not lese than 250 candlos will be light. ed on this oceacion, whicb will require an engine of more than 316 borae pow-

## The luating Oonmithe

Many of those whe bate sutended Annual Moetings aro aware of the great labors usually resting on the Standing Committee. The Commatieo commences its work on Monday morn. ing. works sll day, and somotimes till midnight. Early on Tuesday morning the work is ronewed and contibued till time te open the sersices in the Couneil bualding. At noen an exira sonsion is hold. When the Coonall is udjourned at $4 \rho^{\prime}$ 'clock, the Committee men, instead of resting as ethern do, must enter their room for bubiness and porbaps intay thore, hard at work, 'till after midngbt. Than they work and lose sloop till the mueting clones. In some instunces brethren fall seloop during the acevion, and mithat bo aroused so that the work can go on. I bave secs fromincent members of the Com-
muttee fall aslcep whale silting at the table in the Council room-they could not belp it, thoy were completely wora out. Then, to make it atill worse, the Comtaitteo is aumetimes eovercly consured becsuse it does not do its work right. Cussidoring the advantager under which they labor, it is a wonder
to ino that thoy perform their work as well an they do.

But surh eufferinge as the Atanding Committeo thust ondure is upealled for. There is no use of neth working balf of the mght, losing shop and Wearing themedrea ont when there is quienty of time during the day in which to do all the work heceeary. it is adopted the better it will be fur both the Standiog Committeo and the Andual Mocting.

This srrangement would permit the Brethren to open the Anonal Meoting oarly on Tueeday moraing and commence basinehs at fiem duy to day, ourly and late, withe out wasting hours walung on the Standiog Commuttee
Our Committee of Arrubgouents dineussed this matter pretty filiy during its lant bession We would hke tho Standing Committeo to med at Lanark on Thursday evoning befote the A. THE BAFTISM OF JOHN

Why the baptism of John bes not Christiun baptism Tho assertion is ivequently made that hie bapsism not "Cbristian" But I do not now reassagned but the following, and I for ose must suy, that they ere net stronjs ougb for me to accept.
Because if was practiced before the ame "Christun" wis introduced. If lina is a corrcet pesation, 1 tuinst not Hevept of the commumion and tho oth or ordinances of the bevee of God, for ortil after the teaching and proctice of Cbrist. A secend reason is given, becuuso Paul found cortain distiples at Ephesus, who, it is wild, were haptized with Tobn's baptiom, and he (Paul) ordered intori be baptred again. The barfed baptifed with Johs's baptism. That they were not bsptised by Johin him eolif or any of bis tisepples, is elenr, from the fact, that thoy hud "not so artheh as Reanip whether thero bo any Holy Gboat. Every Biblo reader snowe, or ougbt to lenew, that John,
in all his presebing spoke of at Holy 'ihust.

In spenking of the aivantares, thall do it as compared with tho oldor bjeet of the peopile always was, and is tet, to promere a lume that
call their own. To get this it the thickly popalated Statee in the East, requires a considorcble amount of monoy, enpecially if we wioh to procuro a small troet of land. By taking his money West, three, four or five imes the arount of land can be bought with it - and of a much better quality. This is quito an adcautage to parents who have largo familiea sul sain to proearo homes for thern This. is the reason that a great many people give for leaving the Enst and going Weat. Thoy wish to be able to got farms alad bomes for their thataren. In this, many bave succooden whik others have failed, bat it must thways be remembered that these ancerences and failures should bo attributed, perhaps, as much to the charnctor of the yersons as that of the soil, and the at-
tenuling sulvantages or disudrantages. Tbe greatest timancial mivantrgo reapod by thase gong West Emi buyug wretotore, was the unbniecment of the value of the lant Farms, that ten yeary ago, wero worth from $\$ 2.00$ to $\$ 5.00$ per acre, may now be worth from $81 / 1$ to 8100 or more, owing to loeation. While this enhancement of real catnte forms the exeeption in the East, it to the rule in the Weat. This boing the ease, many reap a large pev eentuge on their invertanonte, even, if they do bot at tirst, make more tban a tring, on the land parchosed. The gan eonviats in the improvoments foade, and the advance in walue-

Another advantage is the small moint of latbor necessary to got the land in a condition for cultivation. While in the more chatorn States it vequiros a vast amonnt of lahor and time, to get the timber off, and eight or ten years to get cleur of roots and stmmps, saying nothing ahont the stones, nill that is nocessaty on the prame, is a good team to break the and, nud you are reaty to put down seed for a corp, thus vasbling tho purchater to put out 1 large erop and haryeat it the first year. These aro adantages that will be appreciated by those who have settled dowa in heavy timbered sections, and sqeent nearly a lifetime in getting it mader astate of cultivation.

## SOOOESBFUL BOYS

Wbo are the boyo that succeed in the world? This, my young friendn is a vory important duextion for you to answer, Shall I aunwer it for you?
As you anil I aro stangers, lot mo
say. I have tud thousands of boyt mider my caso ma a tencbet, and that know who suctood in all the noblor wolkn of life. I thave watr-bed these snccensful boys in the school-room, in
the store, in colloge, on the farmevery where.
Ono trait of cbirractor is posscesed by slll of them in a greator or less de. gree, viz: they all have great prowors they do with all their mighber. I $=$ a lous con to be lonroed, they bring all the nowers of their mind to the tusk until
it ts mastorod. Tbey do not allow thoir miods to wander off, now upon tbis sulyect, and then upon that, but, With an iron will and an unconqueràto bo performed, whetber of the bead or the band, wadirided. and clowo at tention till the work ia done Thin power of concontration is the necrot in the same class. Haes you stady is of far greator importance than that or horo minch gou study.
I bave in my mand now eeversl of my old scbolnre who are ominent as lawyord, physicians, misistors of the
gospel, civil ongineern, buildors, mercoaple, cind onginects, and farmers, all of whom were noted in school for their undivided and close attention to whaterer was to ho done, titbor $a t$ their desks in preparing trecitation.
I romomber ono of these boys in particular, although it to nearly thirty
gears sinco be was a xudent in years sineo be was a xudent in my
sehool. I ean see birs now at bio detk, working nt a dilticult problem in algetra or srithmetic, or trying to
tranalate a suntence in Latid or Greck. It mattered not wbat the study was, he alwnys entered ujon it with the same resolute detorennation to mastor it in the least possible time. He scomed to bring his, whole body, as well as the powera of his mind. to the necom-
plisbing of his tusk. Sow he would oxtend ove log, and
then the other, now ras bil fiegers through bis bair, and then perbaps twist bis none, bis eyes meanwhilo istonsely fixed upon bin book, and bo saw nothing, board nothing, notil that necar falled at rectototion. That boy bas been for several years one of the most prominont judges ith this country, and one of the moast emin
nora of New Jersey.
Boys, if you wish to make your
mark in the world, for nll that is nollo
and good, etrivo to gain the mastery ovor both your mind and your body. Learn to put your whole mind to the
work in band, and my word for it, you will succoed.-G Goldrn Days.

## bDOOEBBFUL EDUOATION,

It is one of the noted foatures of the present age to develop the mind of the youtg. In tho world'e history no period equals ours in the time devotod,
expersec incurred, and paine taken by the State, tho church, and tho family, o oducste and trann the rising generation. The raco of lifo so elocrt, ith work go groat, that every moment of it is rue at high prossure. In an edueation no hurried, the mind of youth boon turnod far into tho channel of right or wrong. All the means that
can be brougbt to bear upon the moral charactor of the young, ehould bo had at any cost. Nothing in the caro
of the ehureb or the family is eo im. of tbo church or tho family is so im. roligtous training of tho young. Every caues of tratb and virtue is based and ustainod by its prisciples being plantd in tho young beart; to Fasi in thi is te fail at last. Every principle of
virtue, knowledge, tomporance, and all taught with their carlicat oducation, and continued ns the more important part, on which nil tho good of learning of the futare, for the ehareh and the world, is in all tho virtuen and priaciples of divine truth, tboronghly settled and fixed in the mind of the young, who aro trained in alf their mental and moral powera to Fork ior
the cause of Cbristianity. Thone in the prime of life, upen whom rest the great reaponsibilities of the age, should study every moans, ombrace overy opportunity, and turn tho groatent offorth of ther life to tho work of bringing up ther children, in a full monsal and moral development, and barmony with the sacred principles of the Gonpet.

## BEORET BOOLETIER.

Every truth is universal and lree,
and full of blessinge for man. Any organization that would keep the truth and its hlespings seerot and hiddon from ith genoral purpose of good and policy, for Chrintianity is aniverabl in its truths and object. All the nocrats founded on the law of God and sature, are of Divine origin, and for goneral grod. But to add a system of origin, principlus or polioios, of human with somo political, or finabcial, or Godilike, Christ-like, or liko angthing cleo tbat works for the genoral foed of all. The Christian should ries higher; stand ou broader, holler groand than any secret welitation, working for a special few; bit for the bouter than the favored fow. This is philanthropy, Christianity, God-hke, and the only love that gres salvation to a failen race
Ooe grest orror of the age, is to

TBE PBINCIPLES OF MISBIOHARY WORE.

Combination and co-operation grown out of union sad onenoss in overy work. The principles of missionary फork is the sole moaning ; it is the spirit, foologg, and purpose of divino love, deep down in the beart; liko Cbrint to give salvation to a dying world. Thin sprit, and love, and power is the soul centre, frome whioh apringe all trao misaonary work. It conncils. It is the living prineqple conncita ltis the living princtple
thog only auxiliarios. They who bingo on conventione and councils bave only the contingonte, which may or tany not bo proper. But the great principle sad soal work of sasing the lost, waits not for grest opportunitioe but makes them. Some will not work if there fa any convention, or condeil, or plas. Some will not work without some great plan of eo-operation. But the beavea bore epirit of love in Chriat, and the apoatlea, would work for man's dividual effort os by combination of oth ers seat by the charch, or led by the spirit, wse all one to the beart overflowing with "love shed sbroad. ${ }^{\prime \prime}$ The widow may be peor, the spostle may be in want, bot sho gives her mite, be gives bis all ; sbo corahines with others $s o$ doen be in the greatest work ever
known to man. Here io the grant cen. ter of anion and oaeaens with God, and bore with a love sad deeire for man'e aolvation hy spreading the trath. Union is this divine priaciple, mesas union in its diviee work (priaciple withont ite work ie dead, being slone), It is God and all His hont co-operating in apirit, Union in this divine to esave ninners. Union in this divine work shonld the po
deep, rise to high, spread so stroog. that little matteris of propriety or expe. diency can never atop or hidder its beavenword march
The Goapel mesas of carrying on the work of salvation, is God's plan of re-
demption pat into the banda of the chorch. To use atl these means, is the epirit and zeal of the primitive chorch, is the only way to lasare prosperity. But to neglect theae means, or to ignore any part of them. is the parent of reak. ness and failare. In the spostelie age they tared all the means that would
avail anytbing in the grest parposo of aslvation. We abonld note carefally all the meson they weed, becnuse it is mrong to neglett or oppote any part of God's plas in Hie work There are a great many wayes sad meane in God's p'an ; preaching, siaging, exhortation, prayer ; these wero anstained by otber meank-
time, atudy, tood, ralment, meney, were all meaps needed, given, and nsed. Just what the great calus ueeded in
what the primitive saiots gave to keep what the primitive saiots gave to keep
the God giveo work moving onwari sed upward. ADy kind of help that was wanted, and sny way is could be given to help on the mirk of Jesan and save sinners was s mbraced by them, becanas the priseaple deep in the beart mide a a foratala of love overflowing to run out in every chonvel opened for the wa-
ters of Ule to flow. They were not so over-particalar aboat juat the kind of belp, neither abont juet the way it fount of love that muat ran ont, aome ways may be better, some may be esaibe boited in conncile and grest worka
bot ell the ways that carry the Goepel to dying nianers wre good enough is their proper place for all are in the Gos. pel. We ean eailly find a churcb in conocilaending Paul and Barnabns. In the primitivs daya thoy were not over particalar about plana, about somo favorice mode, of atill more istedt in fial. ing some faste to all piass They were not contiamally baltiag and eaveliog about platas, cooderaniag all, abd doung aotblng, while at their very door masy be beard the kwoll of dyiag einacrs all around.
This faintly illuastrates the pribciple God has gives to belp on the work of saving souk. The ressel is wreeked, its losd of prakengors east into the orean belpless; some dyiag, nome frot 4 . ing with cold, some anflering with benger and aflitiction, and some wuonded. The noble epirit of love and aympsthy would eet yon to work with all she power and meane yon havo to help and are them, yon would givo your timo or food, or raiment, or mbeney, anything fou can do or give to sevo tbem, comen Freely out of the aoulest priaciple in the tuman aoul. You would not stabd bere with auferiag and death all aronad you and give aothigg, do aothFing, hecanee some of tho plage sre out ast an you would preier; you would oot stand there makiog excuses for yoursolf, and finding fanll with thone Who are doing all thay can by the bent means they know. You woeld not atand tbere with your arma folded. fsolting the kind of help, or the way at wat givon, or whether by individaain or by a couaril, wbile your foliow man a dying for want of the very meane you can give. Magh more important still than thie illastration is, that Chrest anctified and exemplifed the priociplo of diviae love, and its condition and relation and work to anve dylog alaners

But to apply the pasaage in Rev. 20 -
"This is the fret. resurnoction," 5 , "This is the first resurrection," to
the spiritual risiog from the dead tnto the Fife and righteousnees of Christ, an error. This is evident from tho fol lowing facts "First, the whole verse plainly indieatea that not only they Who "reigned with Christ a thousbnd the dead lived not again until the thon*and yearn are finiabed," plainly indi catee thas they also sball live after the thoussad yeare are finished; and the rosurrection bere qpoken of is the piritual, then it necoasarily followe that the "reat of the dend" which would inchde all mankind) will also rise from moral corruption unto the pure and boly spiritual lifo of Cbrist as well as they who reigned with Christ a thousend years
2. The phrase "lived pot agais until," etc, plainly abows that thoy oneo did ive, bonee, would teach that all dia Cbrist.
3. If the spiritual resurrection bere mennt, then it io evident that the
"theu*and years" are not one thousand yoark, aor one handred yeans, but can not be more than the average age of a gonoration, for since the passago tho desd" will aleo apiritually rise after the thousand years ars tinishod, therefore, the "thousand yoara" could not be of longer duretion than the Ago of of the (opiritually) dead" dio with physical daath-loave this atage of action -the gatos of mercy would be cloced againet them, and their probation would end before the "thonkand years" wore finisbed, and so could not atiai the opiritual rosurrection.

His argument for dogma that Chriet would raiso snd judge all the dead, in one day, ("the last day") of twenty four hours, betrays un extrome of the Scriptures. (brist nowhere cosches that he will raise all the dead, the rightoons and the wieked at one nd the same time-the "linst day." To the entrary, be enys: "This in the Fatber's will which sent me, that of

## Dear Brethrou

On the evoning of the $7 t$ ast, according to previoue arrange ments made by the bretbrea of Northeastern and Norib westera Obio, on heloved Gretbren P. Brown and S. T. Boessrman came to me nad ielivered oight discourses, gencrally doctrian in baracter. Their presching eecmed to be approciated by botb saint and esianer. Ind large congregations, eonsidering the bosy seavon with the fartsere, good order sad the best of astention prevailed aring the earvicen. Fome of the aged and same of the poorer class in the neigbborboud which are neldom seen in the asmetary of the Lord, atleaded the meetinge. We are sorry te say that the brethren bad to leave in order to fill op pioturont elsewbero, Just when the people were beglabiog to get deeply isterested is their preschiog The doc rime of the Bretbres is not as generally sown through hero as it should bo. Some came to boar them who hat nevor before beserl the Brethren proach. ind fonted the trutha of the Gospel cx. pounded ita a purer and plaiber yabanor than they bad evor byiore hourd them. On last Kenday brother P. J. Brown reached a very stile sormon in our listrict feboolhouse, at which place he meatings were all bold but one He mpoke from Hebrews 6: 1,2 , to an attedtive audience. As thene was to ppointment loft for them to fill at the Disciple tburcb in Hultiard, we convey. dibem there in the ovening and Bra 8 T. Bossurman spoke to thit people rom St John 6.68, in defeese of tho Goapel as taught by the "Brothren.
Over one year ago a part of our doc rive harl been badly mikropresonted there, by one of their miniaters, viz, sind and gentle mannure, in one sermon, ated the obstruction ont of the way, and did it in half the time that leev. Khes was in putting it there. Wo rere glad that this people could seo and snow that we have ablo brethren sho could nobly atand up and dvfond be traths of the Gospel. Brother Brown, like ons of old, who stood up and told thein wbilo tbero that if there Wis soything in tho Sexiptare that they wished to receive instructions about, to eome to thom. and they wonld

## TEE RRETHREN'S OLOTHINO DEPOT

With dno respect to the opitions kld. 1. II, Mtler nud Hro. 8. II Betl or ns to the propricty of establishing Bretbren's "Clothing Ilouse," we take the liberty of entering our protest against such thingre While we love und respect what is termed the "Oyder of the Brethrea," we do not see the proprialy of getting uI such enter prises, bocabse we sue no ueecssity for
them. While tueh mores may promoto uniformity it is equally possible that they maly protiote style.
Take for example the late invention of' Brothren'r hats. It is trme, they aro nice and just a little comfortable to those who have licads to fit thens, but who can detine the disision line between them and the "atyle" aftor the signitienet name "Bretbren" is orased froar the inkide hring" Bat ns the namo these days is move sugnificant than the thing itself, and wo muat have a "Clothing \& Hat Depot," let us bave the name too, but we suggest that it be pat on the ontside instead of the inside. Then ererybody can sed
that we are "Brethren."
France comnacned bor "Dress Refor mation" on the ples of consistency and crowonay, and to-day she stands at tho bead of the fachionable world, and may wot the "Brothren's Clothing Houso" lead in the same direction?
Aoother reasoa why we fect to pro-
wall bo placing too mach atress upon a onbject on which the Scripteres bave but very littlo to nay. This may be from the fact that there was bat little ocension to talk about whist should be wora, of that it was a matter of miso importance. "Modest apparel thought to be all-sufficicut and that nay tailor of ordinary ability can make, especinlly if bo has the pattern. It is uthe, we diffor in rogurd to mat ciso clsatily towarda ench other in these thinge, but if we were to have a notion towards progtession, it would be to estublixb a "Byetbreo's ILonse" to
irain mimionarius to go out and prearb the Gospel.

While we are hyvomble to using legitumate moans for the porpetuating of plainaess among us, wo do not believe it prudent to rehort to such pacaburey as will become conspichous in the world, and show that we pro mote eon ecrned abont dressing people thun we are abont saving their souls.
Our first and grestost eoncorn should be to inetitute and sustain such onter-
buecessfally to hawe the Gonpol preach el and sibaens cenverted. Ifter eve-
rything in done in this direetion that can be dene, then it will be thm enongl to conaider the propenety of things of minor importance,

It is trae, if ris enterpuise of this kind was marted and the wholo eltarel woald patronive it, it woald mako n Tromentoux big bunness and we roc onmend West Hunfingdon as $n$ znita He leration, lut then wo waet it wh-

Dear Prinsitioc:
Our last whs writtey
from Me. Morria, nad we pronised to ay samething more nbont the place ud our visit there. Mt. Morris is sit. ated on the Iowa Central Railroad, bout one hundred miles west of $\mathrm{Cl} H$. ago, ant in the mulst of a lavge comsnunity of Brothren. It is becoming noted among the Brethren, as it is the Hace where one of our institutioas of darming is sifuated. The college buildings are loented in the centre of wo town on a slight elevation. The found fre beautiful; the buildings re somerbat anclout in their appearavee, but bave reecntly been repuired and now preeent rather a neat and cozy nppeatance. We think the bethron did well when thoy purchnead this inetitution at a cost of 86,0 an. About 86000 have been mpent in repaits making the whrle cont of the baildbgs and gronnde no they now stand, not math orer $\$ 12,000$, whicb in eer-

## OHUROR OOVERNYEAT

The most important matter in chareh overnment is to keep in barmony with be teaching and Whirst of the Scriptore in all ite raling power. The subject and portant that the divine will shoald he consulted in every part of it; from tbo amalleat body of membern to the gr at est council in the brotberbood. Giod'y word ie the supretse law of the church, ad its government is to exccate bin will in his kuagdom on earth. There are mady forms of homen governmeat:
there is but one form of dirise govera. ment, that God gare to lis eburch; to be adminiatered frot, by geperal council, second, for conveniece by charchea; third, by the offcers; fourth, by individ nal membere. Of oscb one we with to peak in its proper plsce, that each one bo anderstood, sad does not infringo
upos the rights or duties of the other.
The firt work of cburch government to see that oill the leaching of the Gospel aro observed ly its menabers Tbe secand is to keep tho eburel unit d in one bodp; that all be of one miod and one Judgwent, and all epeak the eane thinga. For thia purpote a geseral confereace is indupectable, as shown a the 15th ebspter of Acts Without the others, and eves ascb minister would be indepuudent of all others, ex opit the members of bis own charch But the general coalereace is the great hand of uaioo for all the charebes and all the members
The form of chareh goveramest or dalaed in the Gospel is founded on oanaess, surnethiag sure tbana more union, oae mind, one jadgreeat, one epint, one aith, one body, oue as the Father and Son are one. Heacs a lisalted denocratic aud repsblican form, where every wember may apeak and roto on ail the busibess transacted by the church, is charging ita ollicers, receiviog and expelling membere, the woice of each
meruber meat be beard; becabaa each
one is interested and must take case of their aws interest, is the fellowship aod oneness, necessary to the bsppiness of the church.
Another feature of iepportavie in ith goveroment should be noted here, and that is, in all cases efleoting tho fellowbip and oweness of the charch, the voice of the charch sboald bo apanimons, for that is the owly prineiple on which followsbip and oneness cas be aftniaed. Such ns giviog lettora of memberebip, receiving nembers, atad pertaining to the olsserranco of ordinances, and many other things that are eesontial to fehow ship, aboold be unaminons, for that in the meaniag of the apostle when be nays, "Be of one miod, of one judgroent, ote But thero are many thibge that are matters of policy or of expodiency that aro aok esbentísl to fellowhip that masy be decided withoat baving saunl nous consent; ;uch as where a meeting bouse nhall be built, what time meeting shall conamence, low loag it Eball contiaue. The council of the Annual Meetiog being the bighent council in the eburch, its work is a matter of importance in chured government, aext to the Serip tures. It is not is legiblativo body is make laws for the elurch, but sh coort. to decide sucb casce na are bro't

This is suppesed to have beon on ac. count of its location being in close proxımity to the heathens and that they bad, to eome extent, partaken of their rude mannura and jololatrona ens rons. The citizens were called Faza. ronea whech was intended as an epi-
thet of reproacle. Nathaniel basing implabed the spurit of lerselatieh brethren, bas forefathers and the prophete, rike Saul, Ramnol, Jesse, and Nanman, ooked for the Meesiah to come trom a greater kingdoan than Samaria, aod a aore popalar people thae the humblo Nazarenes. Hence the query, "Oan any good thing come out of Nazaroth? Is Gud had to resson with the prophet Philop had to reaoon with Natlianiel and so we muat reason with the urconverted Thongt Nuthamel long ago went to bis fabbers, bis eocd to lay, in ats numerons as the rand of the ac. The same jrajullice coatinuee to nshroud the world in darkness, and verywhero we bear the quary ringing our cars: Can moy goed thing come out of Nazaroth?' This in nos because the question had not been aftir matively anowered, by both God and man, bat becarse of our prejudices and proconceivedopinioas. The world s ever ready to twake bug kacrificen and do groat thiags is Syru, bat it positurdy refoses to make amall eacrifices and do emall thurg in Sumaria, and especially in Naxureth, or to make the application nearcr home, we are willing, in the world and at tho nounch thipge, but are anwilling to do very kmall thinge in the kiogdom of Christ and amonir bis followers. For all this wh have no otber reanon to give than that of prefudice and our love for higb thinge, as both Gud and oven the world
bave clearly shown thus good thage fith come out of Nazareth.
David was found out in the field focding sheep, Mosen, in the niver among the ballrambes, and our blessed Surior in Nacateth anong the moat humblo avd deapized people of the men, In the world, our truly gieut aion were largely of hucable parent ge and rome forth from small places There are many of our bedt and greatest men that we wight name. wo neither great parebtage nor large and respectable elties for thoir kreat old and common wlage, "lurge trees rom small acorns grow' or the mere teriptural one, "derpiee not the day of small thinge." From otursity, Christ hud dwelt in the bonom of the Father, the objcet of bis infinite and eterbal love. But there was one purpose eternally om bodied in the beart of condered him the object of special ondearmunt to the Father. It wum th purpore which was coneucunated 1 , the winding up of the myetorios of' the
incarnution. Truly may tho Futher may to every one of bis people, "Yion 1 bave loved theo with an everkantigg love, therofore with loving kindnesd prosented suggesta two importans roections
The first is, the infinite gaile in us in donbting the love of Giod to 113 . I one of the revealed reasone of the lor
of Giod to Christ is the love whach by boars to us, well unay eternal obame and canfurion of fane eover us, if for a moment we question the infinite love The second is for nis.
The second 38 this. If we wonld be atabjects of special endoarment to the Father, we mast "lay down our lives for the brethres," even as Christ "laid down bis for the sheep." Then will the prayer of Cbriat in reapect to his people be falfilled in our experionce That the love wherewith thon bast
loved me, may be in them, and I it loved me, may be in them,
them." - Times of Refremiag.
